Subject: Ohio Oil Refinery
Date: Thursday, May 01, 2014 1:37:36 PM

There is a site with the name Ohio Oil Refinery, EPA Id No. OK00001981349.

A Preliminary Assessment was conducted in 3/31/1997, EPA Document ID 9419664, prepared by the State of Oklahoma, the Department of Environmental Quality, and reviewed by the EPA.

The EPA recommended 4/21/1997 to move forward with a site inspection.

The Site Inspection was conducted in 7/14/1998, EPA Document ID 693619 (redacted).

The site inspection report was prepared by the State of Oklahoma, the Department of Environmental Quality, and reviewed by the EPA. The site is the former location of a refinery and tank farm, north and separate from the Lorraine and Wilcox Refinery site.

The site inspection was further evaluated and EPA entered a decision on 11/30/1999 ""No Further Remedial Action Planned" (NFRAP) under Superfund will be entered in CERCLIS, and the site will be referred to the State.

Based upon currently available information, this site fails to meet the minimum criteria required to be included, or proposed, at this time on the NPL by the EPA."

The NPL tends to identify the very worst sites in the nation using a specific ranking criteria, and not all sites meet this criteria.
